To whom this may concern,

my comment is

simple.microsoft has been declared a monopoly. With out adequate competition the consumer has been harmed in at least two distinct ways.

1: lack of choice. 2: lack of robust, quality, products that do not have flaws that can cause

loss of data and productivity. When I was a child, I was never given the right to negotiate my punishment when found out. why is this happening with microsoft. At your heart you are the last voice of justice, if you dont stand who will? Please restore proper competition to the market place. Do the right thing.
